EMPLOYEE OWNED. CUSTOMER DRIVEN.

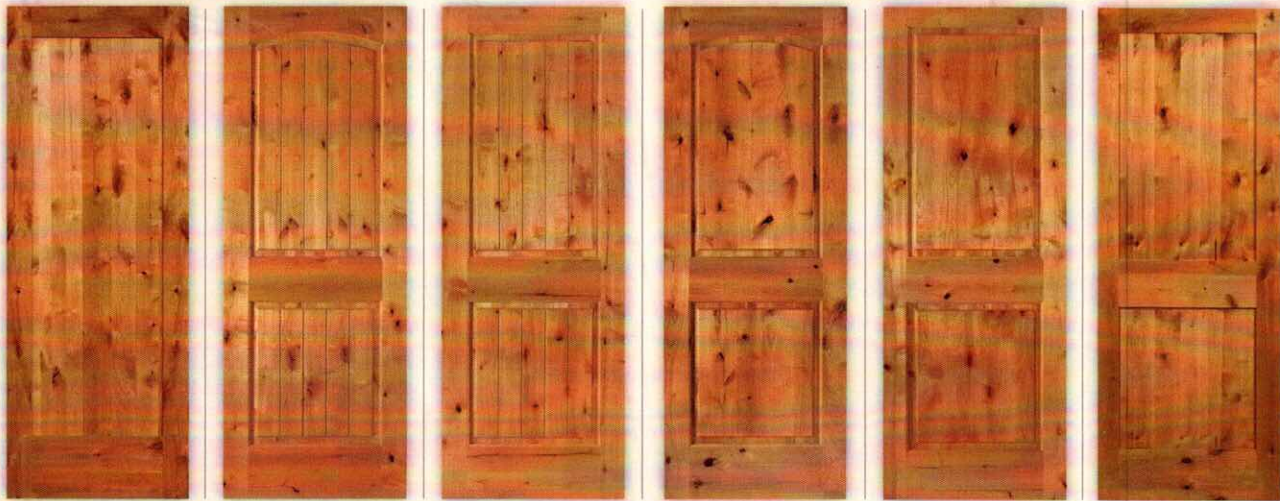

KNOTTY ALDER

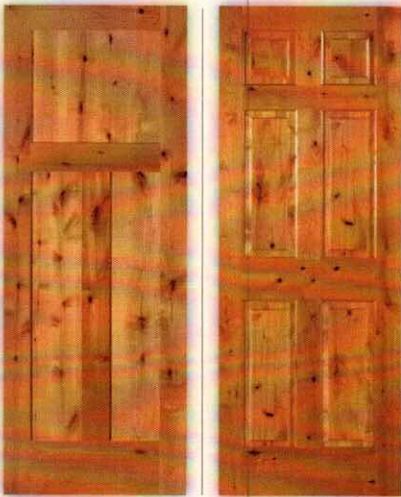

Grown in the Western United States, the grain pattern is subtle, intermixed with random knots. The beauty of this wood is drawn out when the finishing top coat is applied. Rustic elegance is often used to describe our Knotty Alder.

CHERRY

Cherry grows in the Eastern and Midwestern United States. Its beautiful smooth texture and swirling grain is what makes this wood so appealing to the eye. Cherry's unique properties cause the wood to darken with exposure to light.

Quality Construction

Each Western Stile and Rail door component is precision machined to the highest standards in the industry. Once assembled your door not only looks as beautiful as any piece of furniture, its strength and durability will give you years of satisfaction.

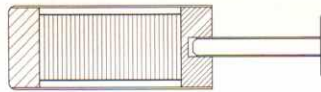

Our door panels feature veneers that exceed architectural door specifications. Thicker veneers assure higher quality and a more consistent finish throughout the door.

SELECT POPLAR

Grown mostly in the Eastern United States, Western's Select Poplar is a medium density hardwood with a fine, even texture similar to Cherry. We meticulously sort our Select Poplar to make sure we have a consistent light color throughout every one of our doors.
