Maximized storage

Large cabinets and drawers fitted around plumbing provide ample storage in each vanity.

Dovetail drawer boxes

9/16" thick solid hardwood material and dovetail joints make a box strong enough to hold any bathroom essential. Drawer box and slides have a 100lb dynamic load rating.

Full extension, soft-close slides

All Jeffrey Alexander vanities are equipped with full extension soft-close slides to maximize the usability of the drawer and minimize its sound.

Variety of styles & sizes

From 24" single to 72" double, there is an array of sizes and styles to fit any need.

Solid furniture-style construction

High quality wood materials and furniture-style construction for a long-lasting vanity. All materials used in Jeffrey Alexander vanities meet the strict CARB2 certifications.

Add a Beautiful Vanity to Your Bath

Complete your bath with a furniture-grade vanity – solid wood construction, ample storage and counter space, carved wood details, and a beautiful finish.

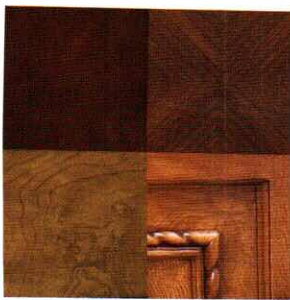

Options for tops

Jeffrey Alexander vanities are available with a top and bowl preassembled or without a top so that you can customize the look of the vanity.

Solid countertop

Each countertop is solid marble, granite, quartz or porcelain. No composite or fillers are used

Rich finishes

Multi-layer hand finishing process. Finishes designed to coordinate with multiple design schemes.

Easy installation

All Jeffrey Alexander vanities come completely assembled. The back panel is precut for plumbing. For top and bowl preassembled models, installation is as easy as removing the box, placing the vanity and hooking up plumbing.

Limited Lifetime Warranty

Lifetime warranty for defects in materials and craftsmanship for the original purchaser.

Maximized storage

Large cabinets and drawers fitted around plumbing provide ample storage in each vanity. Models 48" and larger offer additional drawer storage.

Solid furniture-style construction

High quality MDF wood materials and furniture-style construction provide a long lasting furniture vanity.

High quality MDF wood

MDF provides a strong yet flexible wood material that looks beautiful painted or stained, while being more economical to produce. All materials used in Elements vanities meet strict CARB2 certifications.

Full extension slides

All Elements vanities are equipped with full extension slides to maximize the usability of the drawer.

Designed for 8" widespread faucet

Each countertop is pre-cut for use with an 8" widespread faucet.

Solid countertop

Each countertop is solid granite, marble or porcelain. No composite or fillers are used.

Options for tops

The most popular Elements styles are also available without a top so that you can customize the look of the vanity.

Variety of styles & sizes

From 24" single to 72" double, there is an array of sizes and styles to fit any need.

Add a Beautiful Vanity to Your Bath

Complete your bath with a furniture-grade vanity – solid construction, ample storage and counter space, carved wood details, and a beautiful finish.

Easy installation

Most Elements vanities come completely assembled with the top and bowl preinstalled and the holes for plumbing precut in the back panel. Installation is as easy as removing the box, placing the vanity and hooking up plumbing.

Finishes created by hand

Wood grain, highlights and shading are all created by hand in the multi-layer finishing process. Finishes are designed to coordinate with multiple design schemes.

What is MDF?

MDF is an engineered lumber combining wax, resin and wood fibers. The wax provides moisture resistance, while the resin keeps the mixture uniformly dense. This mixture is then pressed in a machine using high-heat and high-pressure to harden and cut into perfectly flat, knot-free sheets.

- Since the wood fibers are broken up into such small parts, they no longer expand and contract like solid wood or particleboard and MDF tends not to split
- MDF is much denser than particleboard and therefore is a stronger material and is commonly used as a replacement for plywood
- MDF is commonly used in decorative mouldings, doors, furniture and as a component of kitchen cabinets
- Much of MDF comes from recycled content making it more friendly to the environment

What is special about the MDF used in Elements Vanities?

- MDF meets strict California CARB 2 requirements
- MDF is sealed to protect against moisture damage
- The finish is applied in multiple layers to add extra protection against moisture damage

So, what does this mean to you?

It means the Elements vanity you purchase is not only beautiful, but is also made of a strong, durable, sealed material that will last for years.

Limited Lifetime Warranty

Lifetime warranty for defects in materials and craftsmanship for the original purchaser.
